CORE Data Cube NFT Collection

The CORE Data Cube Limited NFT Collection will provide an opportunity to take part in the creation of a powerful community within the Star Atlas ecosystem. The CORE Data Cube NFT's will not only provide a path to shared ownership of the largest starship in Galia, but also provide a host of other rewards, benefits, and exclusive access to the Superphoenix Titan Ship itself.

CORE Data Cube History

The CORE Data Cubes are derived from a combination of Ustur and Photoli technology provided to the original ECOS builders of the colossal Superphoenix Titan Ship. The preservation of serene ecological environments within the ship's vast atriums requires a symbiotic connection that resonates throughout the vessel.

The One Consciousness that composes the core of all Uster existence proved to be a perfect model for the central control and environmental sustainability needed to make the Superphoenix Titan Ship a reality. The universal connectivity and technological infrastructure influenced by Ustur design was still lacking the actual energy and frequency needed to power the massive ship, that when complete, would be almost alive itself.

The sound and light energy gifted to humanity by the Photoli is the power and essence which connects all living things within the biospheres across the huge expanse of the Superphoenix Titan Ship. The resonance of Photoli energy harnessed by Uster technology allows for the crew of this magnificent vessel to maneuver and maintain all aspects of it in perfect concert and harmony.

Near the end of its immense construction a limited number of incredibly special CORE Data Cubes were created using the combination of the two advanced technologies and a small supply of extremely rare Geneisum.

The CORE Data Cubes were energized and downloaded from the completed Superphoenix collective energy force, humbly referred to as GAEA. This connection remains perfectly in sync and allows the holders of these CORE Data Cubes direct access to The Superphoenix Titan Ship as well as receiving downloads of any relevant updates into the future.

CORE Data Cube Tiers

The CORE Data Cubes exist across six levels of power and significance as a direct result of the corresponding amounts of Geneisum originally incorporated into each Data Cube. The color of light energy emitted by the Data Cubes changes with increased intensity as the corresponding levels of Geneisum increase.

- Lower levels of Data Cube energy are contained within the White and Green spectrums.
- Stronger levels of Data Cube energy resonate within the Blue and Red frequencies.
- The highest levels of Data Cube energy emanate from the Gold and Pure Energy cube state.

NFT Creation and Scarcity:

Data Cube Color	Tier	Rarity	Mint Supply
White	1	Common	6,000 unit
Green	2	Uncommon	3,000 unit
Blue	3	Rare	1,000 unit
Red	4	Epic	250 unit
Gold	5	Legendary	50 unit
Pure Energy	6	Anomaly	1 unit *

*No Tier 6 data cubes available at mint. One Tier 6 data cube will be held for raffle after NFT sale is complete.

CORE Data Cube Rewards

A series of rewards and periodic air drops will be awarded to the holders of this limited Data Cube NFT membership collection. Once the NFT sale is complete and all Data Cubes have been minted, a schedule indicating each air drop release and corresponding snapshot will be issued.

The list below provides a breakdown of the rewards allocated to each Data Cube Tier, however, this list is not exclusive and can be added to as time and the maturity of the DAO increase.

White

Tier 1

Common

XXS Ship

Tier 1 Poster

100 DAO Tkns

Green

Tier 2

Uncommon

XS Ship

Tier 2 Poster

200 DAO Tkns

Blue

Tier 3

Rare

S Ship

Tier 3 Poster

400 DAO Tkns

Red

Tier 4

Epic

Med Ship

Tier 4 Poster

1,200 DAO Tkns

Gold

Tier 5

Legendary

Large Ship

Tier 5 Poster

3,600 DAO Tkns

Energy

Tier 6

Anomaly

Capital Ship

Tier 6 Poster

14,400 DAO Tkns

Super Phoenix Commemorative Badge

In addition to the rewards as noted above, an NFT collectable badge will be issued to any original direct buyer via the mint, to commemorate the launch of the Super Phoenix DAO project. The badge will be the first in a hierarchy of badges that will represent individuals' participation in the DAO and future gameplay as part of the Superphoenix command and crew.

Star Atlas Ship Rewards

The ship air drops will be the first to launch once the NFT sale is completed and the subsequent Data Cube upgrade event concludes. The ship drops will be subject to a snapshot which will be announced in advance of the drop. The ship rewards cover all size classes from xx-small through capital and will consist of a ship in each size all from the Ogrika Star Atlas ship manufacturer line.

The Ogrika ship line exudes luxury and sophistication, which aligns perfectly with the Super Phoenix DAO brand. This partnership will offer Data Cube holders a premium experience while exploring the vast expanse of Galia within Star Atlas.

Super Phoenix Poster Collection

The exclusive Super Phoenix NFT posters allocated to each tier will only be minted in the exact quantity corresponding to the outstanding Data Cubes at each tier at the time the snapshot and drop are scheduled. These posters will be individually owned representations of select pieces of the original Superphoenix Titan Ship concept art conceived by the team at Star Atlas.

The ability to own a limited-edition piece of what will become nostalgic artistic concepts of what the Superphoenix Titan Ship is meant to be, will captivate the imagination indefinitely.

Super Phoenix DAO Token Rewards

An air dropped allocation of (Ember) DAO tokens will be remitted to each CORE Data Cube holder at the time the snapshot and drop are scheduled. The number of Ember tokens received will correspond to the Data Cube Teir as noted in the breakdown.

Air dropped Ember tokens will be subject to a one year lock up period where no selling or trading will be authorized. During the lock up period, holders will have the ability to voluntarily stake the allocated portion of air dropped tokens to receive staking rewards and to participate in initial DAO governance. Staking reward earnings will not be subject to the initial lock up period and can be sold, traded, or staked to compound earnings.

Once the initial one year lock up period has expired, all air dropped tokens will be fully tradable. A staking mechanism with time limitations and withdraw cooldowns will be a required component to actively participate in Super Phoenix DAO governance and decision making.

Interior Habitation Whitelist

A late-stage reward that will be afforded CORE Data Cube holders at the time the designated snapshot is taken, will be private early access to the interior land Habitation sale. The exact supply, location, sizes, and costs of land Habs' within the Superphoenix Titan Ship are TBD.

Once interior Hab values are established the Superphoenix Interior Habitation Land Plot pre-sale will be scheduled.

CORE Data Cube Merge Upgrade Event

Following the completion of the CORE Data Cube NFT sale an opportunity to combine multiple Data Cubes for the purpose of upgrading them to the next rarity tier will exist. The concept ties back to the levels of Geneisum held within each Data Cube that also correspond to a factor matching the cubes rarity. This factor of Geneisum concentration between power levels dictates the number of Data Cubes at each level that are required to be combined to form one new Data Cube at the next level.

The breakdown of Geneisum concentration required for each cube level is accretive and can be continued up through all levels of rarity. This method will also be the only direct way to obtain a level 6 Pure Energy Data Cube. The combination of four Gold Tier 5 CORE Data Cubes can be combined to create one Tier 6 Pure Energy CORE Data Cube.

All other CORE Data Cube Tiers are obtainable at random through original minting, and are revealed at the time they are minted, with probability tied directly to the max supply available in each tier.

Tier 1 ~ Common

Tier 2 ~ Uncommon

2 White =

Tier 3 ~ Rare

2 Green =

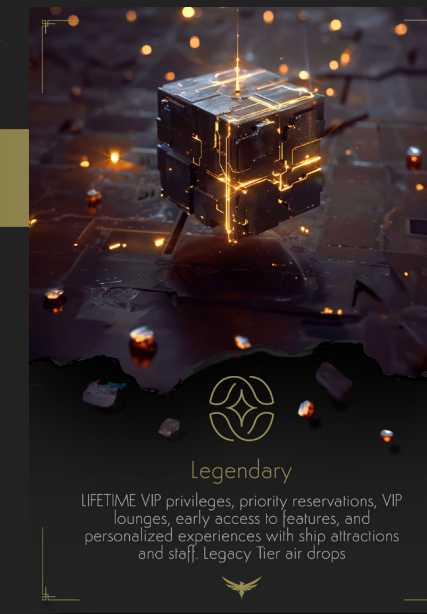

Tier 4 ~ Epic

3 Blue =

Tier 5 ~ Legendary

3 Red =

Tier 6 ~ Anomaly

4 Gold =

Data Cube Merge Values

2 X White = 1 Green

2 X Green = 1 Blue

3 X Blue = 1 Red

3 X Red = 1 Gold

4 X Gold = 1 Pure Energy

The ability to combine originally minted CORE Data Cubes allows for some additional strategy when curating a collection of Data Cubes prior to the air drop schedule commencing. **The Merge** will effectively burn the original Data Cubes being combined and mint new cubes of the next tier. This dynamic will allow for an organic shift in the final rarity and scarcity of the entire collection, while also stimulating secondary market sales of Data Cubes shortly after launch.

The Merge can add value in the event a holder purchased multiple Data Cubes at mint, but now holds only common or uncommon tiers by offering an option to combine and receive future rewards at a higher tier. **The Merge** may also create the potential for increased demand of specific tier Data Cubes for the duration of the event based on individual holder strategy.

Immediately following the completed CORE Data Cube mint, secondary market trading will be initiated on multiple Solana NFT trading platforms to facilitate the open market demand and to help ensure initial sales are available across multiple tiers throughout **The Merge**.

CORE Data Cube NFT Mint

The CORE Data Cube Mint will be hosted directly on the Super Phoenix DAO website with direct web3 wallet integration. There will be no need to navigate to third party market trading platforms to participate in the CORE Data Cube original mint.

The CORE Data Cube NFT collection is designed to raise the funds needed to build a vibrant community within the Star Atlas ecosystem that crosses between factions and includes all players who are willing to contribute and participate. The Superphoenix Titan Ship will be a significant force within the Star Atlas universe, while also acting as a respite to players eager to experience a virtual entertainment environment that will be unparalleled.

As CORE Data Cube NFT holders you have the opportunity, to not just participate, but help steward and build what will become one of the most sought-after places in all of Galia. Ownership of this CORE Data Cube NFT collection is a Lifetime Membership to a virtual world with endless possibilities.
