

Proposal Name: Access to MonkeDAO for ETH groups

Authors: Flaw

Governance Reviewer: Unjustmouse MonkeDAO

Voting Rules

Category: Governance Proposal

Duration: 7 Days

Quorum: 7.5% (=372/4951 non-frozen, non-burned SMB Gen2 NFTs)

Passing vote: 66% (Super Majority)

Summary

Give curated communities access to MonkeDAO, temporarily.

Proposal Details

As an introduction to the ethos of MonkeDAO we want to allow holders of collections on ETH (Punks, Apes, Penguins, Azukis, and Miladys) to be given access to MonkeDAO, temporarily. Members of communities that are selected will be able to access the MonkeDAO discord, and have temporary perms that will include all discord chats (Gen2 perms) without holding a monke.

Goals / Evaluation Metrics

- To support a cross-chain narrative for MonkeDAO by allowing other communities to join and learn about our community
- To introduce ETH natives to SOL, and vice-versa
- Curating and creating an onboarding sequence for other chains to MonkeDAO

Benefits to DAO & Individual Members

- A social narrative that monkes are collaborative and progressive
- Temporary members could introduce cross-chain alpha, new insights and partnerships
- Expansion of the MonkeDAO community could attract builders, and cross-chain networking

Risks & Concerns

- Security to the Discord (hacks, drains, etc) could present harmful vectors for current members
- Integration of ETH based gating services could add additional risk

- Non-Gen2 members might find it unfair that others are given access to all chats prior to being permitted

Tentative Timeline/Roadmap

- Organize temporary rolls and security measures in discord using selfbot, code created by Flaw, executed by executive team
- Identify target NFT communities, potential marketing and partnerships, executed by executive team
- Execute on adding the temporary roll and adding NFT communities, executed by the executive team

Treasury Spending & Impact

- There is no treasury spending for this proposal.
